Forbes "America's Best Employers 2015" Methodology

The top employers comprising the list were chosen by *Forbes* based on an independent survey conducted by Statista.com. The survey included more than 20,000 American employees working for large U.S. companies and institutions, and U.S. divisions of international firms with at least 2,500 workers in the United States. Respondents were asked anonymously through several online panels how likely they would be to recommend their employer, or any other employer in their industry, to a potential employee. The respondents mirrored the gender, age, region, educational level, and ethnicity of the overall U.S. workforce. More than 3,500 companies were represented in the survey, with *Forbes* creating a list of the top 500 firms for their April 13, 2015 issue.
