

Henry Schein Animal Health Launches Newly Designed Website to Enhance Veterinary Experience

April 20, 2017

Simplified Navigation and New Search Capability Among Site Enhancements

MELVILLE, N.Y., April 20, 2017 – Henry Schein, Inc. (Nasdaq: HSIC) today announced the launch of the newly redesigned website for its market-leading Henry Schein Animal Health business, www.henryscheinvet.com. The new site features enhanced educational content, simplified navigation, new search capability, greater product information, and a range of offerings to enhance its veterinary customers' online experience.

With a refreshed, contemporary look and feel, the new site includes a wide range of enhancements, including a more intuitive layout, an improved search feature with more filtering capabilities, and better navigation to help customers find the products and solutions—supply chain, technology, clinical, and business—that best serve the needs of their practices, clients, and patients. Customers will also have access to more product information, product comparisons and ratings, and a resource center featuring webinars, white papers, and blogs about animal health, industry trends, and practice management.

Developed using responsive design, the website is compatible with all mobile devices and tablets, and is optimized for today's browsers. A live-chat feature that will enable customers to speak directly with customer service representatives through the site is expected to be rolled out next month. The update is the latest in a series of planned company website enhancements, following the re-launch of henryschein.com earlier this year.

"We at Henry Schein Animal Health are committed to offering our customers a website that allows for quick and easy access to the products, solutions, and services they need," said Fran Dirksmeier, President, Henry Schein Animal Health, North America. "By delivering a better user experience on our website, we believe we are helping our customers operate more efficient and profitable practices while providing quality care to their patients."
