

Henry Schein And E4D Technologies Announce New Agreement To Roll Out CAD CAM Technology to Aspen Dental Practices

October 17, 2013

Addition of New E4D Restorative Systems Builds on Aspen Dental and Henry Schein's Long-Standing Relationship

MELVILLE, N.Y., Oct. 17, 2013 /PRNewswire/ -- Henry Schein, Inc. and E4D Technologies today announced a new agreement that will bring the latest in CAD CAM technology to select Aspen Dental practices across the United States. Under the new agreement, the E4D Restorative System will help enhance the care that Aspen Dental providers deliver to patients.

The E4D system, created by E4D Technologies and exclusively distributed by Henry Schein, will provide the dentists who own and operate these Aspen Dental practices the ability to scan, design, and mill restorations right in the office with exceptional precision, speed and patient comfort.

"CAD CAM technology is an integral component in today's dental practice, and we believe the E4D System will excel at helping the dental practitioners at these Aspen practices deliver the highest quality patient care," said Dr. Arwinder Judge, Vice President, Clinical Support, Aspen Dental Management, Inc. (ADMI). "We have partnered with Henry Schein for years to provide the dentists of Aspen Dental with the broadest selection of products and services, and believe they offer the best choices in technology-driven solutions, as well as the comprehensive support needed to optimize this technology in Aspen offices throughout the country."

"The addition of E4D will help ensure that the patients who depend on these Aspen Dental practices for high quality oral health care will receive it even more conveniently, comfortably and efficiently," said Hal Muller, President, Henry Schein Dental's Special Markets Division. "The E4D Restorative System provides Aspen Dental practitioners with powerful new tools in scanning, designing and milling, helping them to streamline the restorative process and enhance the patient experience."

"We are gratified that Aspen Dental chose the E4D system with our new NEVO scanning technology, intuitive design software, and proven robust milling," said Gary Severance, DDS, Chief Marketing Officer, E4D Technologies. "NEVO is the first scanner to use Blue Laser technology, which provides exceptional quality of data capture, 3-D video streaming and ease of use. We look forward to partnering with Aspen and Henry Schein in implementing this new capability in additional Aspen offices for many years to come."

About E4D Technologies

Headquartered in Richardson, Texas, E4D Technologies is taking the dental profession to a higher level of productivity, patient comfort, and convenience with its E4D restorative systems. E4D's open platform and E4D Sky communication network enable dental professionals to choose a custom solution to fit their needs. E4D offers high-speed laser scanning technology to produce digital 3D impressions of teeth without powder. Intuitive DentaLogic™ software enables operators to easily customize restoration designs and send them wirelessly to the precision mill that uses the latest restorative materials to produce fine esthetic restorations. E4D continues to expand the possibilities in dentistry with E4D Compass™ for restorative-driven implant solutions and E4D Compare™ adaptive learning technology for teaching institutions.
